## Recommendation list for cars and installation of iZi Plus

Note: The car manual is the leading guideline and must always be followed. This car list does not limit or guarantee the fit of this child seat.

The child seat is a specific vehicle enhanced child restraint system. It is approved to regulation R44-04 series to use in vehicles fitted with 3-point belts approved to UN/ECE Regulation No. 16 or other equivalent standards.

The child seat is suitable for fixing into the seat positions of the cars listed below, providing approved 3-point belt is fitted and available. Seat positions in other cars may also be suitable to accept this child restraint, however we have not yet tested that combination of car and Stretch seat. If in doubt, consult either BeSafe or the retailer. For updated carlist see: [www.besafe.com](http://www.besafe.com)  
Vehicle seat positions marked with \* can have a storage compartment in front of the vehicle seat.

If the support leg would be positioned on a storage compartment in front of the seat, you must follow the car manufacturer's instructions regarding how to handle the storage compartment. When the floor under the floor support is insufficient to hold the forces you can not use this child seat in this position of the car.

BeSafe recommends to test the installation of this child seat in all vehicle seat positions which are intended to be used and check installation, available space in the vehicle and position of the child, to verify if this child seat is acceptable for your situation.  
Some cars have very limited belt length. Always check in your car to verify if the belt length is long enough for installation.

Recent car model updates are not mentioned with their year of introduction. Generally, this child seat fits in later model updates of the same model.

! Notice: DO NOT use on a passenger seat fitted with activated frontal airbag.
